Phoenix Challenge (London 27 February-3 March 2023)

The U.S. Office of the Under Secretary of Defense for Policy (Office of Information Operations Policy) and The U.K. Ministry of Defence, announce the first 2023 Phoenix Challenge Forum (in-person) focused on “*Orientating to the futures of information environment competition*” in **London 27 February – 3 March 2023**. This event follows the Phoenix Challenge outcome-based conference and workshop series intended to drive knowledge collaboration and solutions across Defense and Security Organizations, Academia, Private Sector and International Partners to address complex issues related to Cognitive Security, Information Competition & Conflict, and Malign Influence.

The event’s theme focuses on identifying and addressing the most salient challenges facing Governments, private sector, and associated international institutions & organizations today. The forthcoming agenda and approach will feature International (Defense) delegations, Executives, Experts and Policy Makers from a host of interested allied Nations and Institutions.
